SKILLS

- Jupyter notebook
- SQL
- Docker
- Html, Css, Javascript
- Customer Service
- Windows Troubleshooting
- Microsoft Office
- Tablue
- Python
- Git
- Networking

LANGUAGES

- English (Fluent)
- Afrikaans(Intermediate)
- French(basic)

PROFILE

I am an ambitious 18-year-old specializing in IT support with a strong foundation in coding, data analysis, and machine learning. I excel at resolving technical issues and optimizing performance. Committed to continuous improvement, I enhance my web development skills to stay current with technology. Outside of tech, I dedicate myself to guitar practice, blending technical expertise with creative discipline.

WORK EXPERIENCE

KRISH LITE MECHANICS - OPERATION SUPERVISOR 2016-2024

Marketing Manager & Specialist

- Developed strong customer service skills from a young age, consistently addressing client needs with personalized solutions and effective communication, leading to high levels of customer satisfaction and loyalty.
- Applied hands-on technical expertise to diagnose and repair complex automotive issues, utilizing problem-solving skills and a systematic approach that translates well to IT support environments.
- Implemented data-driven strategies to enhance service efficiency and streamline operations, demonstrating a blend of technical acumen and customer-focused problem-solving, relevant for managing IT support tasks and improving system performance.

HOSTING - DEPLOYMENT 2024

- Deployed interactive data dashboards using datasets for group projects, managing online hosting on a personal server.
- Configured and optimized server performance with Linux (Ubuntu), ensuring robust security and system stability.
- Collaborated effectively with team members to integrate dashboard features, enhancing user experience.Developed expertise in web hosting technologies, including Linux command-line interfaces and server configuration.

INTENSIVE COLLEGE COURSE COMPLETION IN WEB DEVELOPMENT, APPLICATION DEVELOPMENT, AND AI

2024

- •Completed intensive 3-day courses at Beville College specializing in Web Development, Application Development, and Artificial Intelligence.
- Earned certificates in relevant technologies including HTML, CSS, JavaScrip, AI algorithms, machine learning, and natural language processing.
- Led initiatives applying data-driven approaches to develop and implement innovative solutions.

IMB

2023-2024

- Docker Essentials: A Developer Introduction
- Data Analysis with Python
- SQL and Relational Databases 101
- Data Visualization with R
- Deep Learning with TensorFlow

YESTERPLATT PRIMARY SCHOOL, CAPE TOWN: ACADEMIC JOURNEY AND SELF-DIRECTED LEARNING

- 2016 - 2020

- Excelled in mathematics at Yesterplatt Primary in Cape Town, demonstrating proficiency through grade 7.
- Received a scholarship offer from UCT, which I couldn't pursue due to financial constraints.
- Initiated self-directed learning in computer science, guided by my father's expertise as a former IT technician specializing in networking.

EDUCATION

HARVARD UNIVERSITY CS50 CERTIFICATE IN COMPUTER SCIENCE

2023-2024

- Completed Harvard University's CS50 Introduction to Computer Science and Python courses, mastering programming fundamentals and advanced Python techniques. Enhanced proficiency in data analysis, equipping with skills to tackle complex analytical problems. Demonstrated a strong commitment to continuous learning and excellence in solving challenging computational tasks.

GOOGLE ANALYTICS CERTIFICATIONS

2024

- Earned certifications including Google Analytics for Power Users, Getting Started With Google Analytics 360, Google Analytics for Beginners, and Advanced Google Analytics.
- Applied skills to analyze data, optimize website performance, and derive actionable insights.
- Continuous improvement in analytics proficiency to drive strategic decision-making and enhance business outcomes.

FreeCodeCamp Certifications in Web Development and Scientific Computing

2022-2024

- Advanced Certifications: Earned prestigious certifications from FreeCodeCamp in Responsive Web Design, Front End Development Libraries, Data Visualization, and Scientific Computing with Python
- Data Mastery: Transformed intricate data sets into compelling visual narratives that captivate and inform.
- Python Proficiency: Implemented cutting-edge Python-based analytical solutions to optimize data analysis.
- Strategic Insights: Delivered impactful, data-driven insights, empowering strategic decision-making and driving business success.
